Education

University of Virginia, School of Engineering and Applied Science

GPA 3.89

B.S. in Computer Science | B.S. in Mathematics

August 2023 – May 2027

Coursework Data Structures & Algorithms I/II, Software Engineering I/II, Cybersecurity

Experience

Chapter One, New York City, NY

AI Software Engineer Intern

May 2025 – Aug 2025

- Streamlined onboarding in the CRM, reducing setup time by 30%, improving activation rates by 25%, and accelerating time-to-revenue to drive an incremental \$25k in quarterly ARR
- Achieved +20% conversion rates by deploying a predictive lead-scoring model into Salesforce via AWS Lambda and Step functions
- Designed a real-time dashboard using React and D3.js, aggregating CRM data to analyze engagement trends and empowering marketing to boost click-throughs by 15%

StudyStay, Charlottesville, VA | Website

Lead Software Engineer

September 2024 – Present

- 5-figures in revenue & \$10k seed grant from the Darden School of Business (at UVA)
- Cofounded StudyStay to provide a platform for exchange students to find housing domestically and overseas.
- Spearheaded 100% of the development for www.studystay.us/in, scaling to accommodate 500+ unique users, using NextJS, Prisma, and AWS services.
- Optimized an AWS Aurora PostgreSQL database and AWS S3 Bucket to serve content with <1 second latency, even with complex queries of 100+ images.

Infrastructure Simulation, Sensing and Evaluation Lab (I-S²EE), University of Virginia

Software Engineer Intern

September 2023 – May 2025

- Developed STRUCT+, an iOS AR app integrating TensorFlow Lite for real-time structural analysis with >80% accuracy across 1,200+ test cases.
- Engineered an ML inference pipeline, reducing model execution time by 65% to achieve <500ms latency.
- Compressed deep learning models by 75% via quantization and pruning, optimizing memory efficiency for mobile deployment.

Cory, Personal Project

AI Meal Generator Assistant

July 2024 – December 2025

- Built a serverless AI meal-planning API using AWS Lambda & API Gateway, generating 200+ personalized meal plans from precise macronutrient inputs (ex. 15g of fat, 50g of protein) and returned as JSON format.
- Designed a scalable AWS-native backend with DynamoDB, S3, and Cognito, with 99.99% uptime

Technical Skills

- | | |
|------------------------|--|
| Languages | C++, Java, Python, TypeScript, HTML, CSS, SQL |
| Frameworks & Libraries | ReactJS, NextJS, NodeJS, TensorFlow, PyTorch |
| Cloud & DevOps | AWS (Lambda, S3, DynamoDB, Cognito, Aurora, etc.), MongoDB |

Certifications

Amazon Web Services Certified Cloud Practitioner

Expires June 2027
